15:45 -16:00	Short evaluation, future prospects, sendoff
16:00- 17:00	Cultural highlight (Guided tour monastery), Apéro

\* Science market – Exchanging ideas, projects, materials, presentation of organizations, companies, schools and institutes. A place to relax and chat!

- Hands-on experiments are essential in science teaching. Teachers know experiments they love. We would like to share these 'insider tips' and make them available for colleagues and friends. Small is beautiful. A simple, nice approach, a model, a game is often of high value – teachers can take advantage and integrate new ideas in their daily teaching. Inspire us! We'll show you our jewels. We offer you a little booth and count on your willingness to share and network.
- We invite institutions, companies, and organizations to introduce themselves. Editors are invited to promote their most recent science teaching textbooks. Let's experience new options in microscopy, macro-photography, and measuring- technologies.
- The whole event is free of charge. Interpharma is generously supporting our Life Sciences Symposium the last years.
