### Science Market

- **A place to exchange ideas and chat and network!** There is also an opportunity to meet companies, schools, student research centers, organizations, institutes and publishers.
- Invitation to our guests: Bring your 'pearls', your tried and tested little experiments! Shared joy is double joy! A good model, a game - other teachers can benefit. Inspire each other! We will provide some tables. With a short mail (voluntary) you secure your place
- As our guests you will also find information on new measuring techniques and microscopes, presented by experts.
- The whole event is free of charge for our visitors. Interpharma has been supporting the BCN for many years and also finances our symposium!  
The BCN thanks!
